Heat Your House With Gas By Using a Gasteam Radiator

Each radiator is a steam heater in itself. It is safe, sanitary and economical. There is no coal to carry in and no ashes to carry out, and it does away with an endless amount of dust and dirt.

It maintains an even temperature and the gas flow is shut off automatically when the desired steam pressure is reached, thereby preventing waste of gas.

Call and witness a demonstration at our office.

CHRISTMAS MAIL SUGGESTIONS

Made by Postmaster William Caruthers—Timely Advice for

Wrapping and Addressing Christmas Packages—What

Will Go by Parcel Post—Where to Mail Packages.

Postmaster Caruthers offers the following suggestions relative to Christmas packages going through the mails:

Extraordinary regulations will be made to prevent congestion at parcel post windows and to insure an expeditious mail service during the busy Christmas period, but on account of the enormous volume of mail to be handled this can only be accomplished with the co-operation of the public.

Compliance with the following suggestions in mailing Christmas parcels will greatly relieve the situation and will be appreciated.

Wrapping of Packages.

In the usual course of handling parcels through the mails, it is necessary to arrange sacks in piles; thus the wrapping of parcels should be of sufficient strength to resist the pressure of the other mail in the sack, but to withstand the weight of the other sacks of mail which may be piled thereon. It is obviously to the interest of the sender, therefore, to see that parcels are securely packed, wrapped and tied. Parcels improperly packed will not be accepted for mailing.

Umbrellas, canes, golf sticks, fishing rods and similar articles should be fastened between boards slightly longer and wider than the articles enclosed.

Flats in pasteboard boxes should be crated with wood unless packed in double corrugated boxes, and must not exceed 72 inches in length and 48 inches in width.

Cut flowers should be placed in boxes of wood, tin or heavy corrugated pasteboard.

Candles in thin pasteboard boxes should be included in outer boxes of wood, tin or corrugated pasteboard.

Drawings or paintings when not flat should be placed in a wooden stick and then carefully wrapped or inserted in a pasteboard tube.

Sharp instruments or other articles with sharp corners or edges should have the points or edges well protected so as to prevent damage to other mail.

Articles of glass, crockery, Christmas toys easily breakable, glassware, etc., should be packed in double corrugated boxes of metal, wood, leather or corrugated pasteboard with sufficient excelsior, raw cotton or similar material to prevent the contents from coming in contact with any portion of the box. Such parcels should be marked "Fragile."

Address.

Addresses should be complete and plainly written in ink. The name and address of the sender must be placed on the upper left hand corner, the name and address of the addressee on the lower right hand corner, and the stamps on the upper right hand corner.

In addition to the name and address of the sender, which is required, it is permissible to write or print on the covering of parcel of fourth class mail, a label or tag or label attached thereto, the occupation of the sender, and to indicate in a small number, name or other designation, the description to the character of the parcel, full address and for the necessary return address. These labels should be taken home and attached to the parcel to be insured in advance of their presentation to the post office window, thus saving time and avoiding inconvenience during the holiday period.

Parcels sealed or otherwise closed against inspection are subject to the usual postal regulations.

Written matter in the nature of a personal communication subjects unsent parcels to the letter rate of postage.

Mail matter should be addressed legibly and completely. The name of the addressee, the postoffice and territory should be given. If the addressee resides in a city having free delivery, the house number and street, if known, should be given.

Photographs, Books and Printed Matter.

Photographs, printed books, if un-

der eight ounces, and other printed matter are not embraced in the parcel post, but are third class matter, one cent for each two ounces or fraction thereof, unsealed.

Parcel Post.

Parcels weighing four ounces or less are mailed at the rate of one cent for each ounce or fraction of an ounce, regardless of distance. Parcels weighing more than four ounces are mailed at the pound rates, a fraction of a pound being considered a full pound.

In the first and second zone the limit is 50 pounds for parcel post packages and in the other zones 30 pounds.

General.

A parcel containing two or more classes of mail matter is chargeable with postage at the rate applicable to the highest class of matter included.

A parcel containing two articles, one being matter of the third class (printed matter) and the other matter of the fourth class (merchandise), is chargeable with postage at the fourth class rate.

Parcels containing two or more classes of mail matter are chargeable with postage at the rate applicable to the highest class of matter included.

Parcels containing two or more classes of mail matter are chargeable with postage at the rate applicable to the highest class of matter included.

Parcels containing two or more classes of mail matter are chargeable with postage at the rate applicable to the highest class of matter included.

Parcels containing two or more classes of mail matter are chargeable with postage at the rate applicable to the highest class of matter included.

Parcels containing two or more classes of mail matter are chargeable with postage at the rate applicable to the highest class of matter included.
